

**Test Objective:**

The objective is to automate the below testcase using selenium WebDriver and framework concepts.

**Testcase: Tc13**

**Process:** Sign in and Fill address

**Steps to Execute:**

1. Sign in on user page: <https://atozgroceries.com>
2. Go to MyAccount
3. Go to My Address
4. Without filling the address details
5. Update the details and verify the error message
6. Fill the address details.
7. Update the details

**Expected Results:**

1. Validate the error message
2. Validate the success message
3. Validate the presence of updated address on the database under my account in the user page
4. Verify the presence of updated address on the database.
